

What Does it Take to Achieve

World Class Snow & Ice Services?

Larry Schneider, Streets Superintendent
City of Fort Collins
Fort Collins, Colorado

A Vision for a New Snow Facility

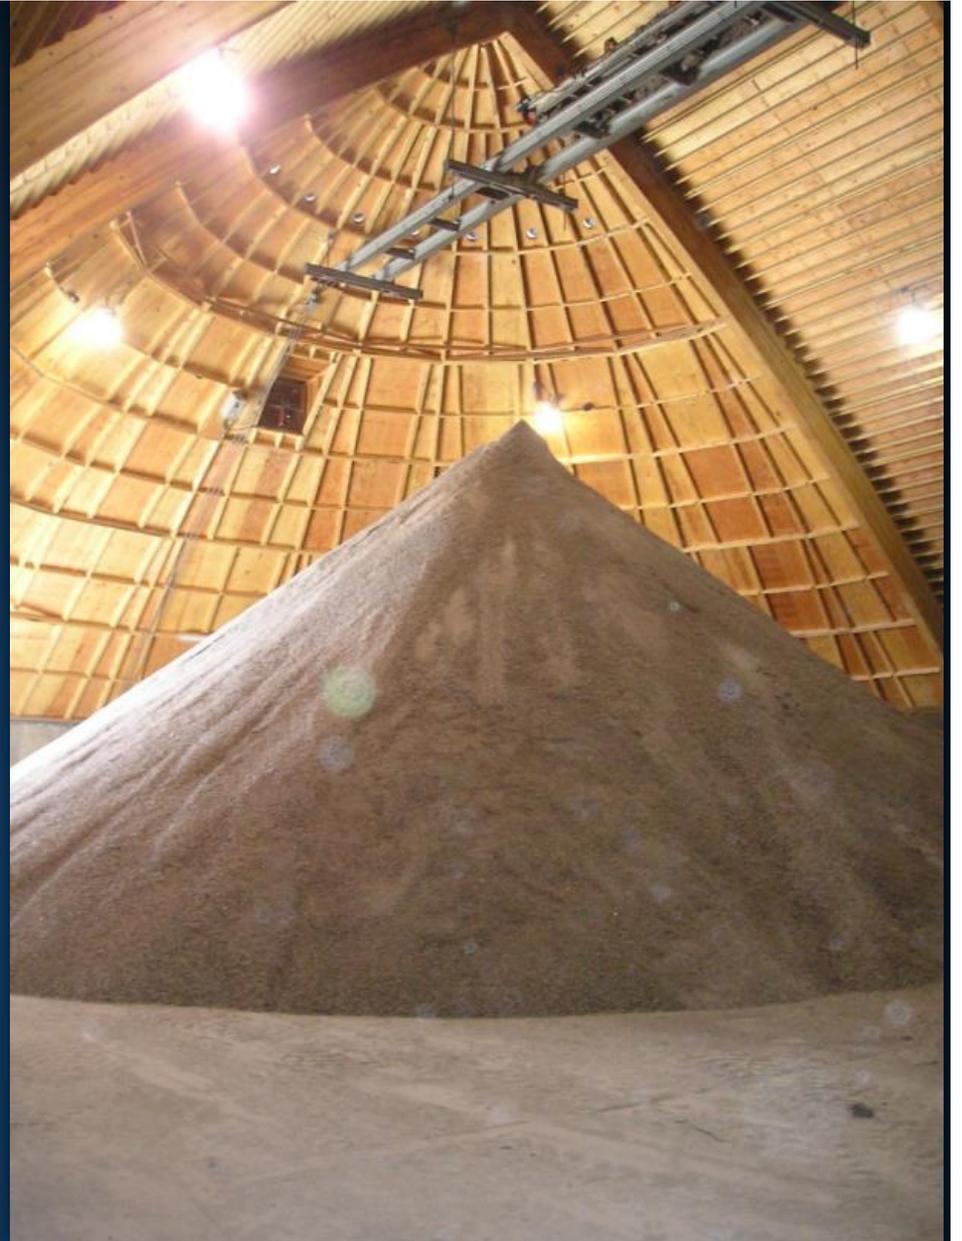

A New Material Storage Structure

- Total Project Cost: \$3.2 Million
- Construction time: 10 months
- 10,000 Tons
- 220,000 Gallons

Material Storage Facility

Producing the Right Mix of Brine

Material Management

- Truck Loading Island
- Quick Attach Setup
- 4 Loading Arms
- 2 Hand Style Hoses
- 160 GPM Loading

Why Alternative Fuels?

The City of Fort Collins, Colorado is determined to become carbon neutral community-wide by 2050.

- Reduce the City's greenhouse gases by 20% by 2020.
- 80% by 2030
- Consistent with a Community Goal

Compressed Natural Gas Fleet

Compressed Natural Gas – 59 Units

- 8 tandem plow trucks
- Cost \$370,000 each

Fort Collins Streets Facility

A photograph of a snowy street at dusk. Two snowplows are clearing the road, with their headlights on. The street is lined with trees and utility poles. The sky is a deep blue, and the overall scene is dimly lit. The text "Tools for Effective Planning and Execution" is overlaid in white on the lower half of the image.

Tools for Effective Planning and Execution

Automatic Spray Systems

- Spray systems use Apogee (Non-Chloride)
- Weather sensors automatically turn on system
- Remote control clicker

Live Traffic in Fort Collins Compared to Neighboring Cities

Downtown

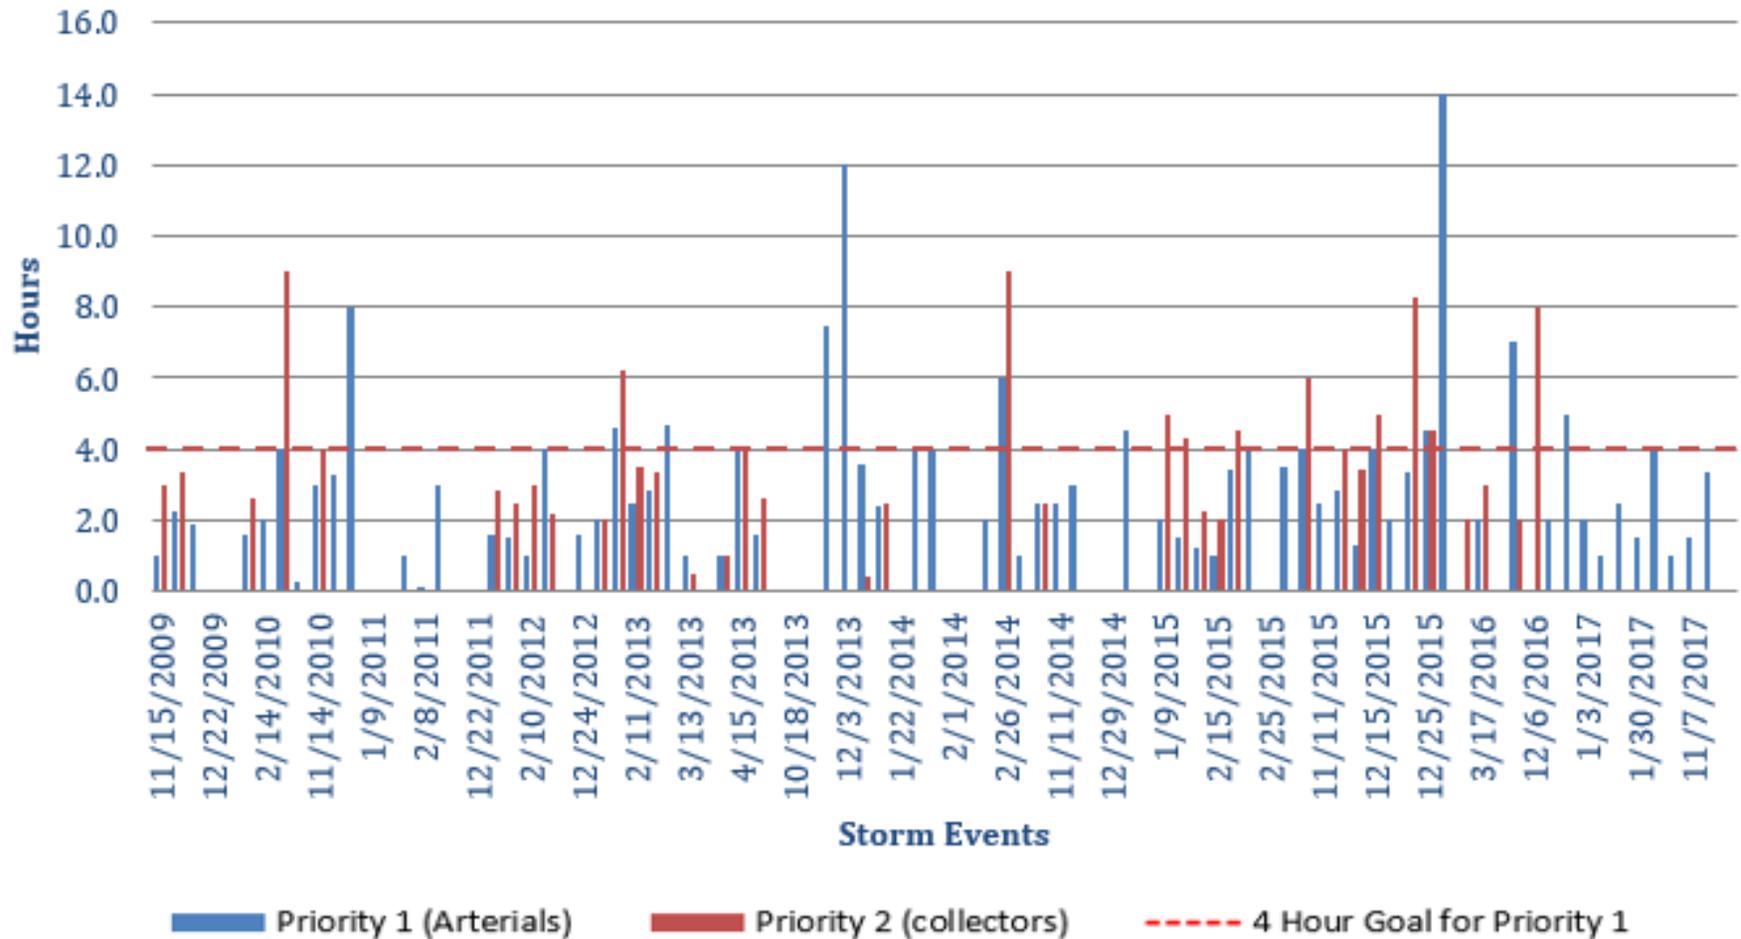

Striving for Bare Pavement in Record Time

Snow Removal Based on Priority Level

- **Priority 1** – Arterial Streets are plowed curb-to-curb.
- **Priority 2** – Collector Streets – Priority 2 streets are selected to complete the network of major traffic volume streets. Collector streets are not plowed curb-to-curb; snow is plowed to the gutter.
- **Priority 3** – School Areas and Bus Routes – These streets include all remaining collectors, bus routes, and access to schools. Priority 3 streets are plowed to the gutter.
- **Priority 4** – Residential Streets – only plowed when snow accumulations completely block traffic movement.
- **Bike Lanes** – 280 miles of bike lanes. Majority of bike lanes cleared by tandem axle plow.

Average Time to Bare Pavement

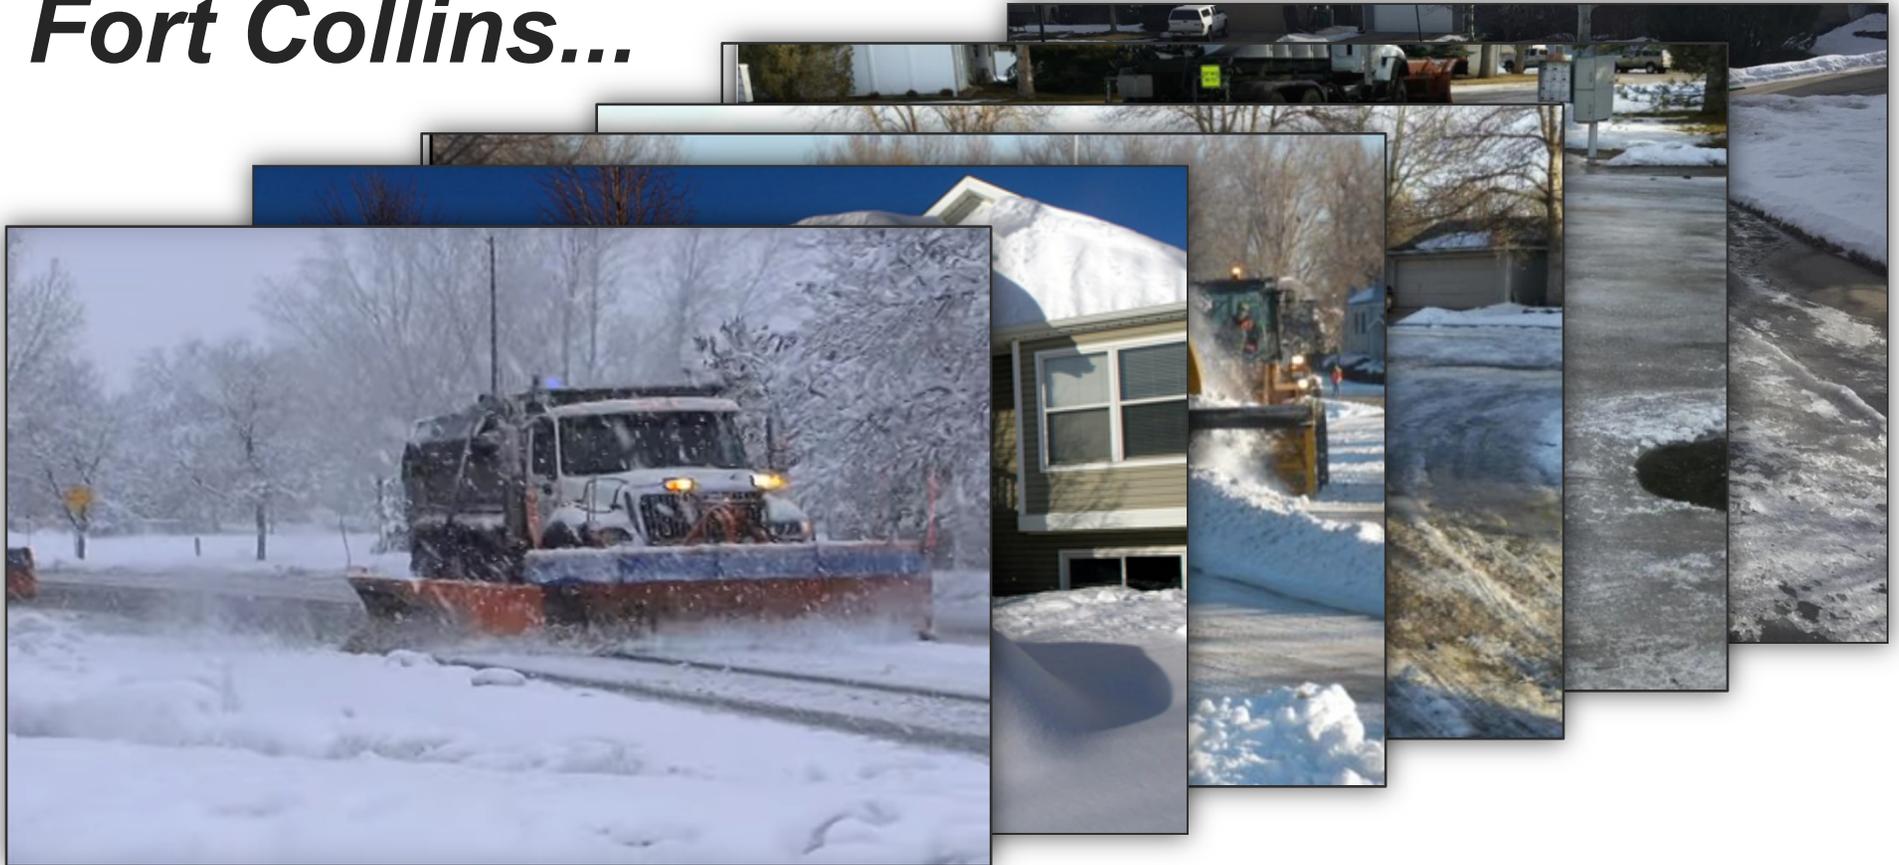

Priority 1 (Arterials)

Priority 2 (collectors)

4 Hour Goal for Priority 1

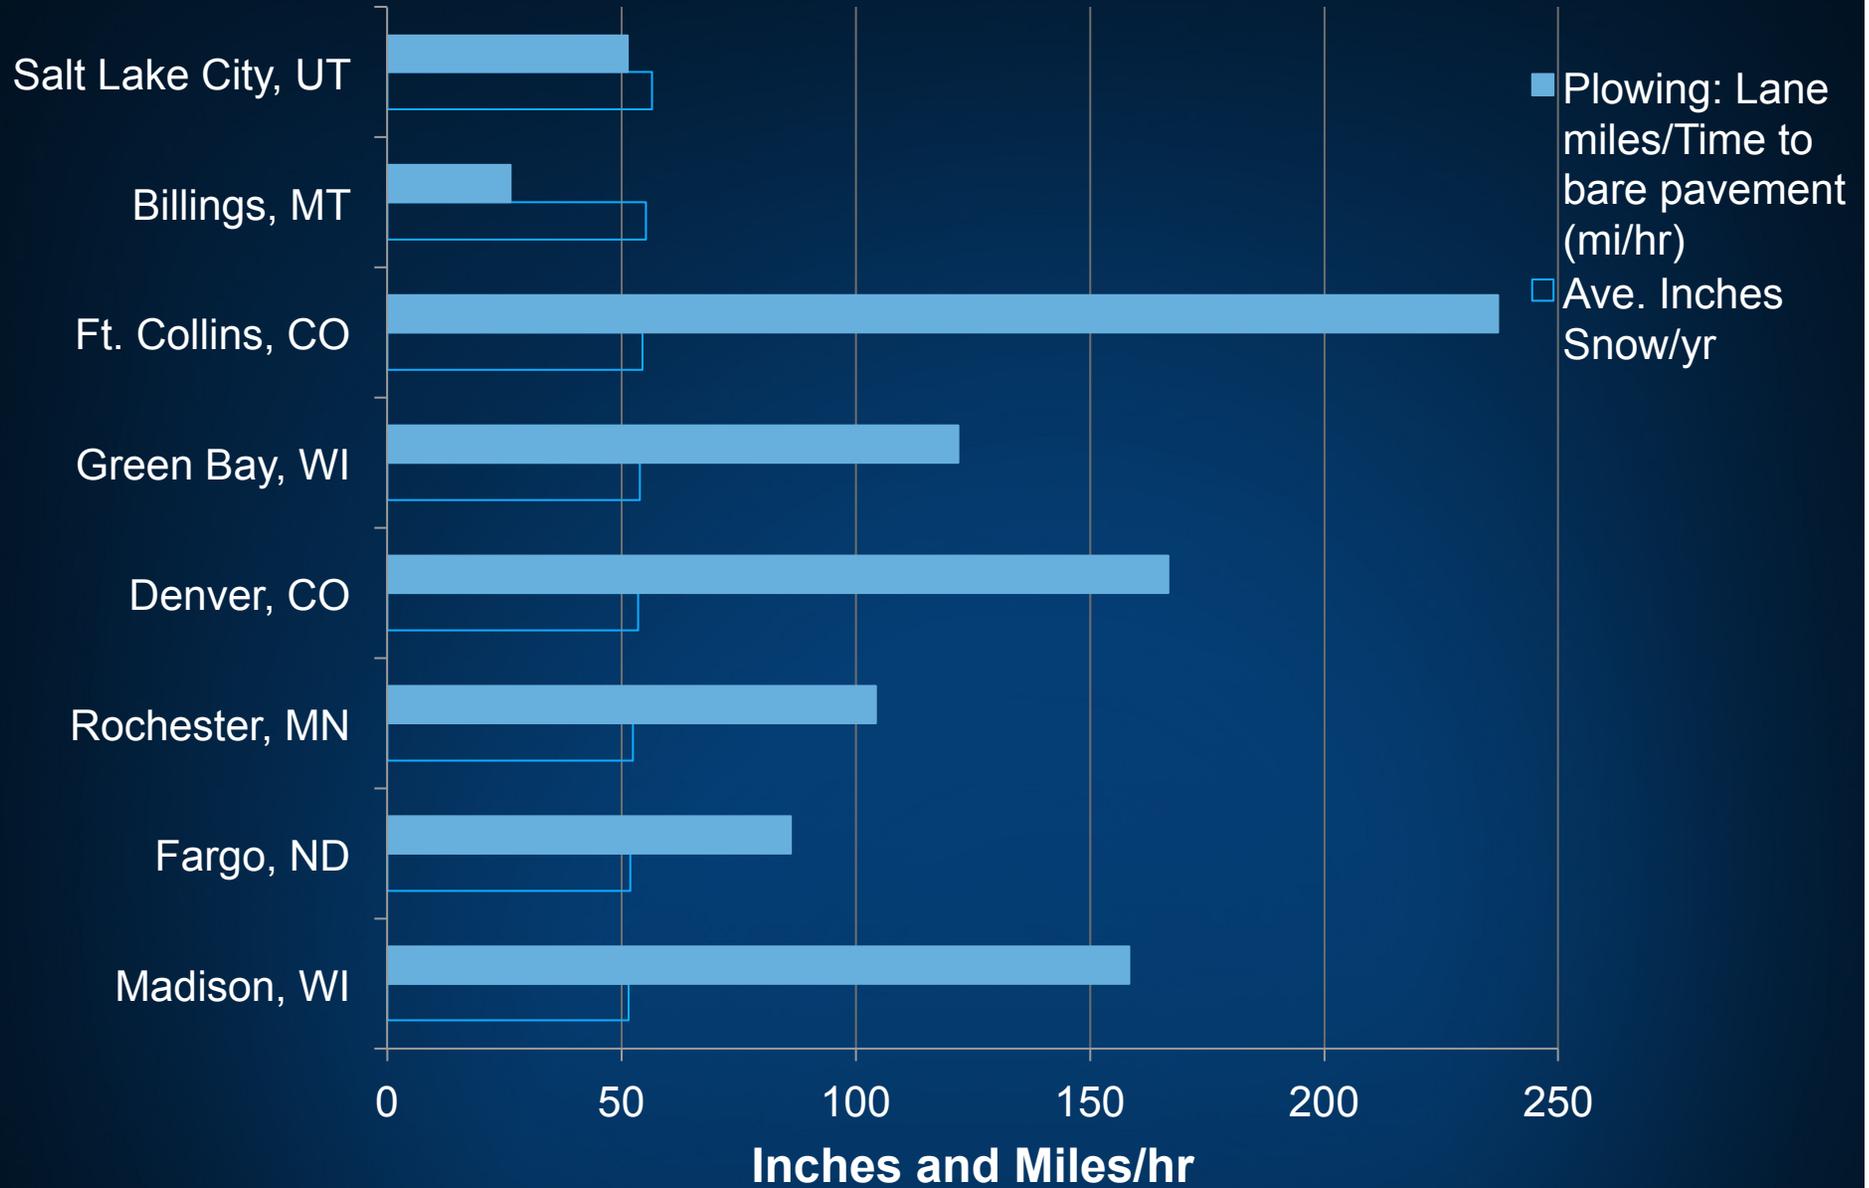

Fort Collins...

Top 15 **Snowiest Major City in the Nation**

Lane Miles: 1257

Plowing Rate for several Snowiest Major Cities*

*30-year average annual snowfall data from NOAA's National Climatic Data Center. Major cities have a population of at least 100,000, as of the latest U.S. census estimate.
